SUMMARY

I've been following AI developments since 2022 — tracking model releases, API changes, and automation tooling as they happened. That grounding shows in how I work now: building content pipelines, setting up Claude Code workflows, writing API integrations, and maintaining production stability with minimal manual oversight. I pick up new stacks quickly and ship things that hold up in production.

WORK EXPERIENCE

AI Automation Lead / Head of SMM

Dec 2024 – Present

WebHostMost — Chisinau, Moldova (Remote)

- Use Claude Code daily to build and ship production systems — Python, Node.js, FastAPI, REST APIs — without switching between tools
- Deployed and maintain multiple AI services on Linux VPS (systemd, Nginx, SSH); services recover automatically on failure
- Built custom MCP servers and Claude Code plugin integrations (GitHub, Playwright, HeyGen, Context7) for specific workflow needs
- Built a 4-agent content pipeline (Content → SEO → Social → Analytics): brief in, cross-posted content out, fully automated

SEO Copywriter / Marketing Specialist

Aug 2024 – Present

THE.Hosting — Chisinau, Moldova (Remote)

- +43% organic traffic in 6 months via systematic keyword strategy and SEO content production
- Viral campaign: 4.5× traffic spike — 54,210 visits vs ~12,000 monthly baseline
- +140% AI-referred traffic through AIO (AI-optimized) content strategy
- Automated backlink outreach, publication tracking, and content QA workflows

App Store Release Manager / QA Engineer

Mar – Dec 2023

Midnight.works — Chisinau, Moldova

- App Store / Google Play submissions, release scheduling, metadata, and iOS/Android manual QA

KEY PROJECTS

AI-Assisted Development Setup ● In daily use

Context files, cross-session memory, MCP plugins (GitHub, Playwright, HeyGen), parallel agents via git worktrees. All projects below built inside this setup.

Claude Code CLI · MCP Architecture · Context Engineering · Git Worktrees

Autonomous VPS Agent Infrastructure ● Always-on · 24/7

Several AI services on Linux VPS: systemd, Nginx, SSH automation, structured logging. Runs autonomously with automatic recovery on failure.

Linux · systemd · Nginx · FastAPI · SSH · Structured Logging

Multi-Agent AI Marketing Platform ● Live in production

4 Claude API agents (Content, SEO, Social, Analytics) orchestrated by central controller. Brief → published content, zero manual steps.

Claude API · Python · Multi-Agent Orchestration · WordPress REST API

Video Creator Extension · Bot Factory · LinkedIn AI Bot

HeyGen video pipeline (brief → script → avatar → YouTube, fully automated) · FastAPI bot deployment platform via SSH · Autonomous RSS→LinkedIn publishing bot (@the_linked_bot).

Imperial SDK (agent platform) · HeyGen API · FastAPI · LinkedIn API · Claude API
